

Nutritious Food Choices

At every possible eating occasion, students will have opportunities to practice what they are taught in nutrition education and choose nutritious snacks that are low in fat, sodium and added sugars.

The Food and Nutrition Services Department will take steps to ensure:

- Nutritious foods are always available as an affordable option (a-la-carte) whenever food is served or sold.

The schools are encouraged to take steps to ensure:

- Students have limited opportunities to eat snacks high in fat, sodium or added sugars; and
- Competition with nutritious meals served by the school food service program is minimized.

The emphasis on nutritious food choices applies to:

- A la carte items (separate food choices) offered by the food service program;
- Snacks and beverages sold from vending machines, school stores and fund-raising activities that may compete with the food service program; and
- Snacks and beverages that are available as part of a school-sponsored activity.

In accordance with Colorado state law, and as applied to any contracts with vendors entered into or renewed by the district on or after July 1, 2009, each beverage offered for sale to students from any source, including the school cafeteria, vending machines, school stores, fund-raising activities, and school-sponsored events conducted on school grounds, shall satisfy the minimum nutritional standards for beverages adopted by the State Board of Education. This applies to beverages sold on campus during the regular school day and time spent by students after the school's regular hours of operation for any purpose, including participation in child care programs or extracurricular activities.

Adopted: February 9, 2009
