Student Dell Start Up Guide

- Please plug in the power cord for the computer which is located on the left hand side of the device.

- To turn on the Device, the power button is located on the right hand side of the device.

- Open the lid
- Once the device is powered up you will see a screen similar to the one below

- Hit the Enter button on the Keyboard and now you will see the screen below

- Please select the Wifi “Internet” icon
- It will open and look similar to the screen below. This allows you to connect to your wireless network
• Please select your wifi at your location

• Enter in the password to connect to your wifi and hit next

• If you have the option please select “Connect Automatically”, this will prevent you from having to connect to your wifi every time the machine reboots.

• Once you are connected to your Wifi, we are now ready to sign into the device
• Please enter in your current AD username and password that you use at school and hit enter (or the arrow to the right of password)
Below is an example

Please use your full email address for your login an example is:
Kjohnson96@cherrycreekschools.org

• When you successfully enter in your information you will see the Welcome screen as it tries to sign in.
• Once signed in you see your desktop, next step would be to login to Google Chrome

• Please launch Google Chrome from desktop
• Please select the Sign in to Chrome Icon

• When you click on the icon the menu below will appear, please select Sign in to Chrome

• The Sign in to Chrome page will appear, the Student will need to enter in their Full Email Address and then select “Next”
• The password screen will appear and the Student will need to enter in their password and select “Next”

• The student will see the message below, please select Link Data

• The final screen the student will see is that their account is now Synced

• Now we are ready to start learning!
  • Please remember when users are done working for the day please have the student sign out of the device, close the lid and ensure it is powered on. This ensures that the device says up to date.

  **Troubleshooting tip**

  • If you are having issues connecting to wifi, look to see if wifi has been turned off
If it has then on the keyboard select the blue “Fn” key and the “Home” key located in the numbers row. This will turn wifi back on.
