

Academic Resources

The following courses are offered at Grandview High School for ELECTIVE credit only. They help to fulfill the 5.5 elective credits required for graduation from the Cherry Creek School District.

Peer Tutoring
(Semester)

Student Success
Center

GAP
(Grandview
Academy Program)

Academic Resource Descriptions

Course Name	Grade Level	Credit	Course Length	Fee	Prerequisite	Course Description
Peer Tutoring	10-12	0.5	Semester	None	Teacher Recommendation	Peer Tutors will begin with training at the beginning of each semester to develop and enhance their communication, problem solving, and conflict resolution skills. They will also learn about academic skills necessary to support student learning and core academic areas. Students will be assigned as a Peer Tutor during one class period for the entire semester. Services provided by peer tutoring include academic tutoring and organizational skills. Students may also provide supervised and appropriate personal/social support. Peer Tutors must make a semester commitment to the Peer Tutoring Program.
Student Success Center	9	0.5	Semester	None	None	The Student Success Center Course is assigned to students if academic data suggests that extra support in the core courses is needed. Students work with teachers or peer tutors in the Student Success Center (SSC), Math Tutoring Center, or Grandview's Reading, Writing, and Organizing Lab. Students may be exited from the SSC after sufficient academic data has been collected to demonstrate proficiency.
GAP (Grandview Academy Program)	9-12	0	Semester	None	Counselor and Dean recommendation	Students enrolled in GAP have the opportunity to recover credits towards graduation that they have previously failed in the general education setting. This self-paced program uses the eXtralearning software (Edmentum). Credits are available in core classes and do not replace previously-earned grades. This is a pass/fail program; however, students must meet minimum performance requirements per semester to remain in the program.
