**Updating Student Devices**

Information Systems continuously updates all Windows Student Devices, both the ones in the schools and those used at home. Most of those updates get pushed out at night, so it is important that at the end of the day students log off from their devices, close the lid and leave them plugged in and powered overnight. They should not be shutting off their computers. Updates then will run overnight and minimize day-time disruptions.

**How to Sign-Out:**

1) Windows Menu - User Icon - Sign out

2) Alternatively, press **CTR-ALT-DEL** at the same time and then click **Sign out**

3) Close the lid of the laptop and connect to a power source.
